Problem – Solution Fit

Date	3 July 2026
Team ID	SWTID-2026-8260
Project Name	A Comprehensive Measure of Well-Being using HDI Prediction System
Maximum Marks	5 Marks

Problem-Solution Fit Canvas:

1. CUSTOMER SEGMENT(S) [CS]

- Government organizations
- Policy makers
- Researchers & Analysts
- NGOs working on human development
- Students & Data science learners

6. CUSTOMER LIMITATIONS EG. BUDGET, DEVICES [CL]

- Limited technical knowledge
- Lack of real-time data
- Budget constraints
- Limited access to ML tools

5. AVAILABLE SOLUTIONS PROS & CONS [AS]

- **Traditional statistical reports**
- **Manual HDI calculations**

Cons:

- **Static**
- **Not predictive**
- **Time-consuming**

2. PROBLEMS / PAINS + ITS FREQUENCY [PR]

- Difficulty in measuring overall well-being accurately
- Lack of integrated system combining multiple factors
- Manual analysis is time-consuming
- Inconsistent predictions across regions

9. PROBLEM ROOT / CAUSE [RC]

- No unified predictive system
- Data fragmentation
- Lack of automation

7. BEHAVIOR + ITS INTENSITY [BE]

- Frequent need for analysis
- High dependency on reports
- Moderate to high urgency

3. TRIGGERS TO ACT [TR]

- Need for better policy decisions
- Increasing focus on human development metrics
- Demand for data-driven governance
- Awareness about quality of life indicators

10. YOUR SOLUTION [SL]

- A machine learning-based HDI prediction system
- Interactive web application
- Real-time predictions based on input factors
- Visual insights & analytics

8. CHANNELS OF BEHAVIOR [CH]

- Online dashboards
- Government portals
- Research publications

4. EMOTIONS BEFORE / AFTER [EM]

- Before: Confusion, inefficiency, lack of clarity
- After: Confidence, clarity, data-driven insights
