

Problem Statement

Date	2 July 2026
Team ID	SWTID-2026-8260
Project Name	A Comprehensive Measure of Well-Being using HDI Prediction System
Maximum Marks	3 Marks

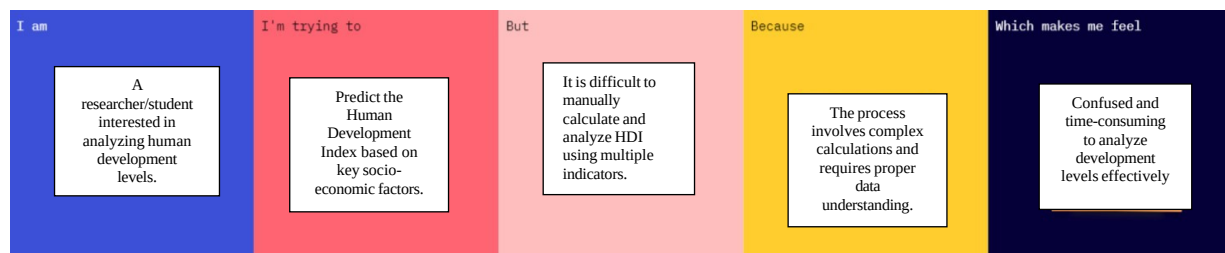

DEFINE PROBLEM STATEMENT (Customer Problem Statement Template)

The goal of this project is to understand and analyze the problem of measuring human development efficiently. Human Development Index (HDI) is a key indicator used to evaluate the overall well-being of a country, considering factors such as health, education, and income.

However, calculating and analyzing HDI manually for different scenarios can be complex, time-consuming, and requires domain knowledge.

This project aims to develop a machine learning-based system that can predict HDI values based on user-provided inputs, making the process simple, fast, and accessible.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A student/researcher analyzing development	Predict HDI	Hard to calculate manually	Complex indicators	Time-consuming & confusing
