

Data Flow Diagram

Date	3 July 2026
Team ID	SWTID-2026-8260
Project Name	A Comprehensive Measure of Well-Being using HDI Prediction System
Maximum Marks	2 Marks

Data Flow Diagram:

DFD Symbol Legend:

Symbol	Name	Description
Oval / Rounded shape	External Entity	A person, organization, or system outside the project that sends or receives data (e.g., User).
Rectangle with numbered header	Process	An activity that transforms incoming data into outgoing data (e.g., Data Processing, Prediction).
Rectangle	Data Store	A place where data is stored for later use (e.g., Dataset, Trained Model).
Labeled arrow	Data Flow	The movement of data between entities, processes, and data stores, labeled with what data is being passed.

Explanation:

1. User provides four input features related to Health, Education, and Income.
2. The system validates and preprocesses the input.
3. Processed data is used by the ML. model (Linear Regression) to predict HDI.
4. The system returns the Predicted HDI value along with its category to the user.
5. User can provide new inputs to get predictions again.
